CODE OF ETHICS - IN RESEARCH

Rajas Dental College and Hospital is committed to observe, promote and assist in genuine academic researches carried out by its staffs and students. High quality, honesty and accountability are the main objectives of our code of ethics. In vital research and publication, Ethics and plagiarism play a significant constituent role. Often observed frequently, that researchers claim others work as their own, which will degrade the reputation of the researcher/institution and ultimately the authenticity of the research. This mandates the need for verification of researches carried out by students/staffs before submission of their works in the form of Project reports, Seminar papers, Research papers, Research proposals and dissertation work. Especially the research work in the form of papers/projects should go through the process of plagiarism and has to maintain high academic and production standards. The research work produced would be thoroughly assessed for their viability
