AutoLib – Integrated Web- based Library Management Software
Salient Features

AutoLib Software System
A leading Library & Campus Management (ERP) Solution provider – established in 1998 to provide low cost IT Solution

AutoLib
A popular Library Management Software being used in 500 reputed organizations in India and abroad since 1998

Web based software
It is a web based software - needs to be installed only in the server. Therefore, no need to install the software in all the client machines. It saves a lot time to maintain the client systems.

Browser based
The Software can be used by IE and Mozilla Browsers. It is very simple and easy to use.

Front end
This software has been developed using Java technologies which provides more flexibility, security, scalability and stability.

Backend RDBMS
The present version uses MySQL - an open source RDBMS, which is being used in many reputed institutions /universities including government institutions worldwide. MySQL is considered to be one of the best RDBMS. Users need not to invest to buy MySQL. They can save upto Rs.50,000 -90,000.

Authentication and Restrictions
Login password is given to all users
Access can be authenticated by passwords
User can change password at any time
Admin can restricts the facility provided to various categories of users

Various Categories of Users
The following categories of users are provided based on their roles. The roles are:
Users
Counter
Admin II
Admin I
Users → will have access to search and also view his transaction details
